The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-23550

Stream : Rock Creek

Applicant : Bill and Lauri Engleman

2901 Grange Hall Road Corydon, IN 47112-8256

Description : A new bridge will be constructed to carry a private drive across the stream. The

new structure will be a single-span steel beam bridge with a span length of 28'. The structure will have an out-to-out length of 30' and a clear roadway width of 12'. The spill through concrete abutments will be armored with riprap placed over geotextile fabric. The abutments and piers will be skewed 10 degrees to align with streamflow. The approach roads will be elevated a maximum of 1.5' above the existing grade. Details of the project are contained in information and plans

received at the Division of Water on September 30, 2005.

Location : Approximately 1500' east of the west section line and 1600' north of the south

section line

near Corydon, Harrison Township, Harrison County

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312

Application # : FW-23551

Stream : Carmel Creek

Applicant : Woodland Country Club

Kay Hewett

100 Woodland Lane Carmel, IN 46032-3567

Description : The existing tee box at Hole 13 will be reduced in size and a 30' wide x 60' long

tee box will be constructed 100' streamward of the existing tee box. The new tee box will have 1:1 sideslopes with a toe slope elevation of 801', NGVD and a top of fill elevation of 821', NGVD. The tee box will be constructed in the alignment of the existing fairway and will not result in the loss of any mature trees. Details of the project are contained in information and plans received at the Division of

Water on September 30, 2005.

Location : Woodland Country Club Golf Course, along the west bank, approximately 300'

south of Pine Valley Road and extending downstream 60'

DOWNSTREAM: near Carmel, Clay Township, Hamilton County

Application # : FW-23552

Stream : Mud Creek

Applicant : Tim Lyons

6437 North 200 East Windfall, IN 46076-9234

Description : A farm pond will be constructed along the north (left) bank of Mud Creek. The

irregular shaped pond will be approximately 118' by 125' by 16' deep. The excavated soil will be used to construct a berm at an approximate elevation of 844', NGVD29, around the pond to prevent runoff and floodwaters from entering the pond. Any excess excavated soil will be placed just south of the pond and will be graded and seeded. Details of the project are contained in information and

plans received at the Division of Water on September 30, 2005.

Location : 6437 North 200 East; beginning at the County Road 200 East crossing and

extending approximately 1000' north and 1200' east

Application # : FW-23556

Stream : Bowman Creek

Applicant : Northern Indiana Public Service Company

Ms Sidney Wuellner-Rice 801 East 86th Street

Merrillville, IN 46410-6271

Description

: All creek water will be temporarily diverted from the outlet of the culvert below the NIPSCO facility through temporary piping back into Bowman Creek downstream of the Grand Trunk Western Railroad culvert. A series of well points will be installed to dewater the creek bed and the collected water will be piped through the Norfolk Southern culvert to a temporary water treatment facility located on the NIPSCO facility. Treated water will be discharged to the publicly owned treatment works through the sewer lines located beneath the NIPSCO facility. Approximately 900 cubic yards of soil will be excavated from the remediation area. The soil excavation will include the stream banks and sediments approximately 2' deep in the stream bed along the entire length of the stream from the Norfolk Southern culvert to the Grand Trunk Western Railroad culvert. All excavated material will be stockpiled, amended as necessary to meet transportation and disposal requirements, and loaded into trucks for transportation to an appropriate disposal facility. Geotextile fabric will be placed within the original stream channel and anchored on the banks to provide a surface for the liner material. A low permeability liner, 80 mil high density polyethylene or similar type liner, will be placed within the original stream channel on the geotextile fabric. Approximately 6" of sand will be placed on the liner to provide a protective layer for the liner and riprap will be placed over the sand layer up to the original ground elevations. The stream banks will restored with top soil and reseeded with native species. Details of the project are contained in information and plans received at the Division of Water on October 3, 2005.

Location

North of the NIPSCO Local Operating Area Facility; beginning at the downstream end of the Norfolk Southern Railroad culvert and continuing to the upstream end of the Grand Trunk Western Railroad culvert
